## REPORT OF THE TRUSTEES.

---

*To the Honorable, the General Assembly of the State of Iowa:*

The undersigned Trustees respectfully submit the following as their report of the management and present condition of the Iowa College for the Blind.

The period covered by this report, viz.: September 30, 1881, to June 30, 1883, has been one of marked prosperity in the history of the College. Especially is this true of the term closing June 30, 1883, the attendance of pupils having increased from ninety to one hundred and forty-one.

This increased attendance, together with the liberal provisions made by the Nineteenth General Assembly for the current expenses of the College, has enabled your Trustees to maintain not only the character and efficiency of the Institution, but to greatly advance the same.

The decease of Rev. Robert Carothers, Superintendent, March 17, 1882, made necessary a re-organization of the school. Your Trustees were fortunate in securing the services of T. F. McCune (for five years Assistant Superintendent of the Institution), for the responsible position of Superintendent. Under his direction, assisted by a competent corps of officers and teachers, marked progress has been made in all departments of the College, and harmony and good order prevail.

The College buildings and grounds have received proper attention and repairs, and are now in good condition, with the exception of the slate roof of the College building proper. Your Trustees are of the opinion that the same was improperly constructed. The freezing and thawing during the winter break the slates, and the strong winds blow them off the roof. The result is leakage and great damage to the interior of the building. We think it would be economy for the State to appropriate a sum sufficient for a new roof to the College building.

The appropriation made by the Nineteenth General Assembly, for the purpose of building an iron fence in front of the College grounds, has been expended, and we now have in position a substantial iron fence, costing in the aggregate \$4,089.00. This fence adds greatly to the appearance of the College grounds, and is creditable to the State. The balance of the appropriation for this purpose, viz.: \$411, has been conveyed back into the State Treasury.

The one thousand dollars appropriated by the Nineteenth General Assembly for the purpose of employing an expert oculist to examine the eyes of the pupils and operate on such as were likely to be benefited thereby, has been wholly expended in the employment of Drs. C. M. Hobby, of Iowa City, and E. H. Hazen, of Davenport, both eminent in their specialties, and well known to, and indorsed by, the profession of the State. These gentlemen made operations on pupils with varying results, but all more or less favorable to the patients.

For a more detailed statement, you are respectfully referred to the report of the experts, hereto attached and made a part of this report.

The Board are unanimous in the opinion that the success attending this first experiment of the kind, will warrant another appropriation for the same purpose. The Board would further suggest that in the event of another appropriation being made for this purpose, that they be allowed discretionary power as to having the operations performed within or without the Institution, as may best subserve the interests of both the Institution and patients.

The official reports of the Principal and Treasurer are herewith submitted, to which your attention is invited, as showing in detail the educational and financial condition of the Institution.

The pianos belonging to the Institution have been in constant use from ten to twenty years, and are nearly worn out. They should be replaced by new instruments. The College needs for the Musical Department at least six new pianos, two organs, and several new horns for the use of the orchestra. We ask you for an appropriation of three thousand dollars for the purpose of purchasing musical instruments and music for use of College.

For the purchase of bedsteads, bedding, and furniture, we ask for an appropriation of three thousand dollars.

Constant repairs are needed to properly protect the buildings and heating apparatus of the Institution; and contingencies are likely to arise making necessary expenditures that cannot properly be charged

to the general expenses of the College. We ask an appropriation of twenty-five hundred dollars for contingent expenses and general repair fund.

We ask for an appropriation of \$500 for making needful additions to the library, and for providing the necessary school apparatus.

Respectfully submitted,

M. H. WESTBROOK,  
JACOB SPRINGER,  
C. O. HARRINGTON,  
S. H. WATSON,  
J. F. BARCLAY,  
J. F. WHITE.

## REPORT OF THE PRINCIPAL.

*To his Excellency, BUREN R. SHERMAN, Governor of Iowa:*

SIR—I have the honor to submit the following report of the Iowa College for the Blind, for the period beginning September 30, 1881, and ending June 30, 1883.

REV. ROBERT CAROTHERS.

The Principal by whom the last report was prepared, Rev. Robert Carothers, after a long and painful illness, passed to his eternal home on the 17th day of March, 1882. I would be wanting in gratitude, as well as in duty, if I did not take the first opportunity to put upon record the high admiration of myself and colleagues for this noble man. It was my privilege to be his assistant for five years, during which time, without an exception, our relations were of the most pleasant character. In his death the State has lost a servant, scholarly in his attainments, elevated in his sentiments, wise and loving in the government of those committed to his care.

OFFICERS AND TEACHERS.

The Trustees, at their annual meeting, June 15, 1882, decided that the interests of the Institution would be subserved by the release of the Principal from all financial care. Accordingly Mr. Jas. A. Brown, of Vinton, was elected Steward and general business manager, to receive his trust from the members of the Board, and be held responsible by them alone. This plan has been highly satisfactory to Mr. Brown and myself, and is, I believe, the only true one on which larger educational institutions may be conducted.

It is with a feeling of thankfulness that I acknowledge the faithful and efficient work of the officers and teachers of the Institution, the spirit of unity and harmony that has prevailed among them, their hearty co-operation and loyalty in carrying out all plans proposed. Whatever prosperity the school has enjoyed during the period, is mainly due to their activity and zeal.

## NUMBER OF PUPILS.

At the close, June 14, 1882, of the school term commencing September 7, 1881,

The number of male pupils enrolled was.....	42
The number of female pupils enrolled was.....	52
<hr/>	
The whole number of pupils instructed during the term was....	94

At the close, June 6, 1883, of the school term commencing September 6, 1882,

The number of male pupils enrolled was.....	60
The number of female pupils enrolled was.....	81
<hr/>	
The whole number of pupils instructed during the term was....	141

As will be seen, the greatest number of pupils enrolled within the two school terms embraced in this report was 141.

During the first term of this period,

The number of male pupils admitted was.....	7
The number of female pupils admitted was.....	8
<hr/>	
The whole number of pupils admitted was.....	15

During the second term of this period

The number of male pupils admitted was.....	13
The number of female pupils admitted was.....	22
<hr/>	
The whole number of pupils admitted was.....	35

The whole number of pupils admitted during the period embraced in this report was fifty.

## NATIVITY OF PUPILS ADMITTED DURING THE PERIOD.

Iowa.....	27
Wisconsin.....	4
Indiana.....	2
Nebraska.....	1
Illinois.....	4
Maryland.....	1
Ireland.....	1
Missouri.....	3
Scotland.....	2
New York.....	2
Norway.....	1

Canada.....	1
Ohio.....	1

## CAUSE OF BLINDNESS OF THOSE ADMITTED DURING THE PERIOD.

Sore eyes.....	3
Small-pox.....	1
Congenital.....	4
Brain fever.....	2
Ulcerated cornea.....	1
Scarlet fever.....	3
Unknown.....	14
Accident.....	4
Cholera infantum.....	1
Sympathetic ophthalmia.....	1
Spine fever.....	1
Inflammation.....	3
Purulent conjunctivitis.....	1
Pneumonia.....	2
Scrofula.....	4
Neuralgia.....	1
Measles.....	1
Cataract.....	1
Epilepsy.....	1
Sun-stroke.....	1

## AGE OF PUPILS ADMITTED DURING THE PERIOD.

Under ten years.....	7
Under fifteen years and over ten.....	13
Under twenty years and over fifteen.....	11
Over twenty years.....	19

The following table shows the biennial increase in the number of pupils from 1853 to 1883:

NO. OF REPORTS.	Year.	PRINCIPAL.	No. of pupils admitted biennially.	Total to date of report.
First report	1853	Samuel Bacon	10	10
Second report	1855	Samuel Bacon	11	21
Third report	1857	Samuel Bacon	11	32
Fourth report	1859	Samuel Bacon	20	52
Fifth report	1861	Samuel Bacon	22	74
Sixth report	1863	Orlando Clarke	15	89
Seventh report	1865	Reed Wilkinson	31	120
Eighth report	1867	James L. Geddis	19	139
Ninth report	1869	S. A. Knapp	34	173
Tenth report	1871	S. A. Knapp	65	238
Eleventh report	1873	S. A. Knapp	31	269
Twelfth report	1875	Orlando Clarke	46	315
Thirteenth report	1877	Robert Carothers	51	366
Fourteenth report	1879	Robert Carothers	33	399
Fifteenth report	1881	Robert Carothers	38	437
Sixteenth report	1883	Thomas F. McCune	50	487

From special reports made to the Principal of this Institution by county superintendents of public instruction, from copies of the late census report, from reports of county auditors, and from information derived from citizens throughout the State, the following table is compiled, showing, by counties, the whole number of blind in the State, the number under twenty years of age, and the number of pupils enrolled last term.

COUNTIES.	Whole number of blind.	No. under 20 years of age.	No. of pupils in College last term.	COUNTIES.	Whole number of blind.	No. under 20 years of age.	No. of pupils in College last term.

In carrying out the wish of the State that every blind person of suitable school age and capacity, should be educated, many difficulties are to be met. Institutions for the defective classes are so without the usual channels in which the thoughts of men run, as to engage the public attention but seldom. Notwithstanding constant effort made for years past to bring the advantages of this school to the notice of parents and friends of blind children, the gravest misapprehensions still prevail as to its character, aims and terms of admission. By continuing correspondence with county superintendents of common schools, county auditors and supervisors, parents themselves, and benevolent persons wherever they may be found, it is to be hoped that, in time, a full and unprejudiced knowledge of this Institution will be found in every home of the blind.

### THE LITERARY DEPARTMENT.

The course of study here given will show the literary status of the College.

#### FIRST PRIMARY.

##### CLASS A.

*Raised Print*—Primer and Butler's first reader.  
*Object Lessons*, with reference to drill in language.  
*Oral Spelling*—Swinton's word primer, first year's work.  
*Light Gymnastics*.  
*Addition, subtraction, multiplication and division*, no result being larger than 20.

##### CLASS B.

*Raised Print*—Butler's second and third readers.  
*Language*—Swinton's language primer.  
*Oral Spelling*—Swinton's word primer, second year's work.  
*Light Gymnastics*.  
*Addition, Subtraction, Multiplication and Division* of numbers less than one thousand.  
*Geography*—Outline maps.

#### SECOND PRIMARY.

##### CLASS A.

*Raised Print*—First star reader.  
*N. Y. Point*—Primer and first reader.  
*Oral Spelling*—Swinton's word book, first year's work.  
*Language*—Swinton's language lessons, to page 84.  
*Light Gymnastics*.  
*Geography*—Harper's introductory, to page 50.  
*Colburn's Mental Arithmetic*, to section 12.

##### CLASS B.

*Raised Print*—Second star reader.  
*N. Y. Point*—Second and third readers.  
*Spelling in Point*—Swinton's word book.

#### SECOND YEAR'S WORK.

*Language*—Swinton's language lessons, completed.  
*Light Gymnastics*.  
*Geography*—Harper's introductory, completed.  
*Colburn's Mental Arithmetic*, completed.

#### INTERMEDIATE.

##### CLASS A.

*Raised Point*—United States history.  
*Spelling in Point*—Words in history and geography.  
*Arithmetic*—"Robinson's elementary," to part second.  
*United States History*—"Anderson's grammar school," to Revolution.  
*Harper's School Geography*, to Europe.  
*Swinton's School Composition*.

##### CLASS B.

*Raised Print*—United States History.  
*Spelling in Point*—Words in history and geography.  
*Arithmetic*—"Robinson's elementary," part second.  
*United States History*, completed.  
*Harper's School Geography*, completed.  
*Swinton's School Composition*.

## JUNIOR DEPARTMENT:

FIRST YEAR.	SECOND YEAR.	THIRD YEAR.
Penmanship. Arithmetic. Grammar. Physical Geography.	Penmanship. Arithmetic. Physiology. History.	Penmanship. Arithmetic. Natural Philosophy. History.

## SENIOR DEPARTMENT.

FIRST YEAR.	SECOND YEAR.	THIRD YEAR.
Algebra. Rhetoric. Chemistry. Zoology.	Algebra. Moral Philosophy. Civil Government. American Literature.	Geometry. Mental Philosophy. English Literature. Logic.

The educational work of the Institution begins on the first Wednesday in September, and ends on the first or second Wednesday in June next, when the pupils return to their homes for the summer. At the close, June 6, 1883, of the school work for the period covered by this report:

The number of pupils enrolled in the first primary class was....	32
The number enrolled in the second primary class was.....	16
The number enrolled in the intermediate class was.....	25
The number enrolled in the second junior class was.....	15
The number enrolled in the third junior class was.....	12
The number enrolled in the first senior class was.....	7
The number enrolled in the second senior class was.....	5
The number enrolled in the third senior class was.....	6
The number enrolled, irregular in course, was .....	9

The whole number in literary department was..... 127

Substantial and satisfactory progress has been made in all the branches taught. The teachers have not spared themselves; the students, in the main, have been diligent and attentive. One hour of each day, save Saturday, has been devoted to reading and study of the best literature. Saturday evenings have been at the disposal of the Literary Society, a fine body organized in 1877, by the older pupils, and for the older pupils. By limiting the age at which persons should be eligible to membership, by a strict government according to parliamentary principles, and by a marked cultivation, which

the active ones have been able to acquire, the members themselves have created a sentiment in favor of literary attainment which no faculty could hope ever to do.

At the close of last term the following persons, having completed the course of study, received certificates of graduation:

Ena Cassels, Empire City, Dakota.

Emma Magoon, Millersburg, Iowa.

Christine Lemberg, Cedar Rapids, Iowa.

Alcinda Jones, Drakeville, Iowa.

Mary Harter, Centerville, Iowa.

David M. Davis, West Troy, Iowa.

These were among the brightest students in college. Their friends confidently expect them to fill useful and happy careers.

Our facilities in this department are limited. We have one small library of standard works, and another of raised-print and point books; but of school apparatus we have comparatively nothing. The necessity of globe, shells, stuffed animals and birds, mechanical appliances for illustrating the principles of chemistry and natural philosophy, will be so apparent to you as to need no comment from me.

## THE MUSICAL DEPARTMENT.

The following is a summary of the number of pupils in this department:

In piano music .....	97
Vocal culture—advanced choir .....	53
Vocal culture—primary choir .....	48
Fourth harmony class .....	41
Third harmony class .....	23
Second harmony class .....	23
First harmony class (advanced) .....	15
Orchestra .....	21
Brass band .....	12
Violin .....	26
Guitar .....	15
Organ .....	2
Clarionet .....	1
Flute .....	1

The new-comer, if possessing any musical ability whatever, is enrolled in the fourth harmony or rudiment class; the second or primary choir; and at the same time commences the study and practice of piano playing. Piano, harmony, and vocal culture are continued throughout the whole course, during the latter part of which, instruction as to the best method of teaching seeing pupils, is given one day in the week. The musical director, in examining every student bi-monthly, brings the work of each teacher under his own supervision. We feel that this department will compare favorably with that of any similar Institution; but, as it seems to those who are in a position to know, its needs should be carefully considered ere long. Two of our pianos were purchased six years ago. The remaining ten have been in the Institution from eight to twenty years. They have been in constant use at least ten hours a day for nine months of every twelve; our performers, in general, are young and inclined to be careless; the steam-heated atmosphere of the building is especially trying to musical instruments. The effect of such causes is plain. That the work in this department may keep progress with the times, we feel compelled to express the hope that your Legislature will allow the appropriation asked.

#### THE INDUSTRIAL DEPARTMENT.

The following is a summary of the number of pupils in this department:

Whole number taking lessons in bead-work was.....	51
Whole number taking lessons in sewing was .....	23
Whole number taking lessons in cane-seating was.....	22
Whole number taking lessons in knitting was.....	18
Whole number taking lessons in crocheting was .....	18
Whole number taking lessons in mattress work was .....	13
Whole number taking lessons in broom-making was .....	13

This department has enjoyed more than its accustomed share of prosperity. It is a school of trades in which the element of profit to the Institution has a secondary place; but owing to the skill and discretion of the instructors it has been more than self-supporting. For a financial statement you are referred to the report of the Treasurer.

#### CONDUCT AND DISCIPLINE.

The discipline of the Institution has been mild but firm. Through the influence of the leading pupils a good moral tone has been infused

throughout the school. Seventy-five per cent of the students gave no cause for censure or correction during the year, and of the remaining twenty-five per cent, one half were guilty of offense through thoughtlessness rather than intention. Demerits in the case of older pupils, and a few hours confinement in the hall or library in the case of younger ones, have been found, in all instances save one, to meet the demands of good order. It was thought best to suspend one young man for disobedience, with the understanding, however, that whenever he could obey the regulations of the Institution he would be welcomed back, and gladly.

#### HEALTH.

Harlin Bowman died on the 13th of January last, of cerebral hemorrhage. Silas Waters returned to his home on the 20th day of February last, where he has since died of consumption. The general health of the Institution has been good. Our arrangements for gymnastic work have not been such as we could wish, but by some devices of our own we will be able to give special attention hereafter to physical exercise.

#### CONCLUSION.

In the names of the faculty and students I would express to Rev. Eugene Avery, of Vinton, our sincere thanks for his instructive and entertaining lectures delivered before the school; to Rev. William Brush, D. D., and A. Haines, Esq., for services on Literary Prize Committee; to Mrs. L. T. Sheets, Miss A. Boyd, and Miss Hattie Hawkins, all of Vinton, for services on Musical Prize Committee; to the

*Eagle, Herald, and Observer*, of Vinton.  
*State Press*, of Iowa City.  
*Excelsior*, of Maquoketa.  
*Republican*, of Marengo.  
*Goodson Gazette*, of Staunton, Va.  
*Mitchell County News*, of Mitchell.  
*State Leader*, of Des Moines.  
*The Union*, of Belle Plaine.  
*Iowa South-West*, of Missouri Valley.  
*The Times*, of Cedar Rapids.  
*Missouri Valley Times*, of Missouri Valley.

*Mutes' Companion*, of Faribault, Minn.

*The Hub*, of Harlan.

*Decorah Journal*, of Decorah,

for papers sent to the Institution.

I would also express to the Trustees my high sense of the kindness, support and courtesy which they have always shown toward me. I have the honor to be,

Your obedient servant,

THOMAS F. McCUNE.

## REPORT OF THE OCULISTS.

*To the Board of Trustees Iowa College for the Blind:*

SIRS—We, as expert ophthalmologists, appointed by you under the act of the Legislature at its last session, would respectfully make the following report:

Our first visit to the Institution was made January 2, 1883. The day was devoted to the inspection of the eyes of the inmates, for the purpose of obtaining a general idea of the condition of the eyes of those admitted. We have examined, in all, one hundred and forty-three (143), including students and teachers. Out of this number we find about one third whom we considered subjects for medical interference; about a half of this number for increase of vision, and the other half for the purpose of personal comfort and for relief of pain. Another third of the whole number could be benefited by medical treatment and the adjustment of glasses; the other third needing no treatment.

Owing to the snow blockades there were some visits omitted which otherwise would have been made, and the near approach of the end of the term made it impracticable to proceed further with the surgical cases. Some of the inmates, whom, it seems to us, are the most promising for vision, were not prepared for operation; some of them for reason that the authorities of the school had not been able to obtain the consent of their parents or guardians. This was especially true among eight or ten cases of cataract.

Two cases, one of senile and one of secondary cataract, were operated on with good results, they being enabled to read. The latter, in middle life, had been operated on by a well and favorably known oculist of the United States in early life, but which had not been sufficient to restore vision.

Near the close of the session two others, of hopeful congenital cataract, came forward for operation. The first operation has been

performed on each, but requires further interference to complete the work. With this, in both cases, there is no reason to doubt the eventual restoration of an amount of vision sufficient to change to these little fellows the outer world from a visual blank into a land of colors, flowers, and individuality, with a strong possibility of reading power.

There are still six or eight more, most of whom would be greatly relieved by operation. There were five other cases of this class operated; some with restoration of vision sufficient to find their way without being led, and others with less favorable results, although with prospect of improvement, now the light is let into the retina. These cases were of advanced youth, and it impresses on the surgeon with greater confirmation than before the fact well known in ophthalmic science, that these cases should be operated on in early life, because of the gradual loss of the perceptive function when the light is shut off from the retina. The infant in normal condition requires from three to five months to gain the power of fixing an object. How much of this time is required to develop the perceptive power, we don't know; but it is found that when the light is first let in onto the retina long diseased, it requires time to learn to perceive. It cannot be too strongly impressed that in cataract early relief should be sought.

The operation of iridectomy (artificial pupil), much like the above class of operations, rapidly transfers a patient from a life of inability to see objects to a life of visual activity, by opening a new route for rays to reach the eye. Of these four cases were operated upon; two with results admitting the perception of coarse type, and two with less vision, but improved.

The remainder of the surgical cases were mostly those of the results of chronic inflammation. The cornea in these cases is subjected to constant irritation, either by misplaced eye-lashes or by pressure from lids, causing opacity and great discomfort. These comprised six cases, and all improved. This class of cases sometimes need several operations and long care under observation to obtain the maximum effect. When relieved of the source of irritation, a continual improvement is generally the result. Several cases were operated on more than once, and some had a combination of two or three.

Each surgeon had a patient for whom he performed the melancholy duty of removing both eyes. It was done at their request, to relieve

them from continued pain, and was followed by improvement in general health.

While the results attained may not be all that we could wish, we have to state that *none* have been made worse by our interferences.

There are a number of cases whose meagre sight might be doubled or quadrupled by the adjustment of proper glasses. Many of these, of the kind admitted here, require patient examination with special apparatus, accurate mathematical computation, and the glasses especially ground to formula. This is difficult to do away from the office of the oculist. The compound glass was adjusted in one case, and two of the cataract cases were fitted in the Institution.

We would make due acknowledgement for the patient and efficient attention to the after treatment carried out by Dr. C. C. Griffin, the attending physician of the College. Much of our success must be attributed to his skillful assistance.

Matters pertaining to State hygiene in this connection, which might be incorporated in this report, that have been suggested in the examination of the institution, we omit for brevity. Causes producing blindness; the evidence of gross ignorance or neglect; the effect of their blindness on the general health and habits; the necessity of extra hygienic measures to their particular condition, although not all coming in the province of what is expected of us, are still suggested to the examiner, and would be of some interest to the philanthropist or statistician.

Respectfully submitted,

E. H. HAZEN, M. D.  
C. M. HOBBY, M. D.

---

## TREASURER'S REPORT.

### SPECIAL APPROPRIATIONS.

Special appropriations of the Seventeenth General Assembly.....	
Balance on hand from last report.....	
For bedsteads, mattresses, and bedding.....	\$ 48.40
For repairs on fence, etc.....	50.49
Total balance.....	\$ 98.89

Special appropriations of the Eighteenth General Assembly.....	
Balance on hand from last report.....	
For plastering ceilings, etc.....	\$ 9.10
For musical instruments.....	276.16
Total balance.....	\$285.26

### EXPENDITURES.

Of the balance on hand of the appropriations of the Seventeenth General Assembly, we have expended as shown by the following statement:

For bedsteads, mattresses, and bedding, \$48.40, leaving no balance.

For repairs on fence, etc., \$50.49, leaving no balance.

Of the balance on hand of the appropriations of the Eighteenth General Assembly, we have expended as follows:

For plastering ceilings, etc, \$9.10, leaving no balance.

For musical instruments, \$276.16, leaving no balance.

Of the appropriations of the Nineteenth General Assembly, we have expended as follows:

For general repairs, \$1,500, leaving no balance.

For washing machine, \$300, leaving no balance.

For addition to library, \$455.98, leaving a balance of \$44.02.

For bedsteads and bedding, \$736.64, leaving a balance of \$263.36.

For iron fence in front of grounds, \$4,089; the balance, \$411, has been refunded to State Treasurer.

For the employment of an expert oculist, \$1,000, leaving no balance.

SAMUEL H. WATSON, *Treasurer.*

SAMUEL H. WATSON, *Treasurer.*

REPORT  
OF THE  
JOINT COMMITTEE  
OF THE  
TWENTIETH GENERAL ASSEMBLY  
OF THE  
STATE OF IOWA,  
APPOINTED TO VISIT THE  
INSTITUTION FOR THE BLIND  
LOCATED AT  
VINTON.

---

PRINTED BY ORDER OF THE GENERAL ASSEMBLY.

---

DES MOINES:  
GEO. E. ROBERTS, STATE PRINTER.  
1884.

## REPORT.

---

*To the Twentieth General Assembly:*

Your committee appointed by the Twentieth General Assembly to visit the College for the Blind, at Vinton, most respectfully report:

We find the Institution in a most satisfactory condition, and every facility was cheerfully accorded your committee for a close examination of the accounts and the details of the College work.

The building is substantial and well adapted for the use for which it was designed, but the roof is leaky on account of imperfect construction, and we recommend that it be either repaired thoroughly or rebuilt at once.

We find that the employment of experienced oculists during the past two years has been productive of substantial good, and recommend a continuance of this practice.

Your committee are pleased to find that the able principal of the College, Mr. McCune, has, during the past year, made successful efforts to bring the young blind people of the State under the influences of the adequate provisions that have been made for their education.

We approve the course of study pursued at the College, and are especially pleased to note the advance made by the pupils in the mechanical arts, whereby many of them are lifted from a state of dependence and fitted to earn their own living.

In regard to the special instructions issued by the General Assembly to your committees, we have duly examined, and find—

*First.* That the appropriations made by the last General Assembly have been wisely and economically expended.

*Second.* That they have been expended for the object appropriated.

*Third.* That chapter 67, of the Acts of the Seventeenth General Assembly, has been complied with in not contracting indebtedness in excess of the appropriations.

*Fourth.* That there has been no diversion of the money from the specific purpose for which it was drawn from the State treasury.

We also report the persons employed in the institution, and the salary received by the same, to-wit:

NAME.	POSITION.	PLACE OF BOARDING.	SALARY PER ANNUM.
Thomas F. McCune....	Principal .....	Institution.....	\$ 1,000.00
James A. Brown.....	Steward .....	Institution.....	1,000.00

Joseph Hartley (blind)†	Kitchen work.....	Institution.....	5.00

\*And furnishes medicine.

†Seventy-five dollars per month during winter and \$65 per month during summer.

‡Not employed during warm weather.

§And one suit of clothes per year, about \$15 or \$18.

We also examined carefully the means at hand for protection against fire and of opportunity of escape, and find abundant stair cases to furnish means of exit, but would recommend that the hose and water apparatus be at once put in full and complete repair, and that a night watchman be employed to give alarm and assist the pupils in their escape in case of fire.

Your committee are also led to believe that the present Board of Trustees is too expensive, and recommend that if the number be not reduced they be selected in the future as follows: two from the county of Benton and the remainder from a locality not over one hundred miles from the College.

Your committee cannot close this report without expressing their sense of the high value of the services of Secretary James A. Brown in organizing his admirable system of accounts, and also of Principal McCune for the fine state of discipline and general progress of the College; and they cheerfully recommend that the appropriation asked for be granted.

Signed:

C. A. MARSHALL,

*On behalf of the Senate.*

G. W. HAYZLETT,

W. B. CULBERTSON,

*On behalf of the House.*
